

Evolve e-Learning delivers online courses on key Medical OSHA, HIPAA, HR/EEO, Fraud & Abuse and Hazmat topics at a fraction of the cost of classroom training.

Employees receive training from any device with access to the Internet. On-demand...any time...and at their own pace.

Evolve's hosted learning management system allows clinics, physician practices, ASC's, hospitals, business associates and other healthcare organizations to deliver well-documented, interactive training to their employees without installing any hardware or software.

INTERACTIVE MOBILE READY ONLINE COURSEWARE

The courses keep learners focused on the material with effective use of online animation and sound. The compliance courses use a powerful combination of audio, Flash, HTML5, text and graphics.

ONLINE TESTING AND CERTIFATES OF COMPLETION

All courses have online tests so you can easily measure learner comprehension of the training information. Tests results are automatically posted to the learners' training record to document training results. Learners automatically receive a certificate of completion when they complete and pass the end-of-course assessment.

REPORTS TO ACCESS TRAINING STATUS AND RESULTS

Administrators and managers can easily identify training status in real-time with powerful reports for pinpointing who has or has not completed their assigned courses.

Training reports can be setup to automatically email to designated recipients.

GETTING STARTED IS A BREEZE

Getting the system setup and training started is easy and can be completed in as little as one day since there's no hardware or software to install. We do all the training setup so you can begin training without any delay.

Online OSHA, HR/EEO and HIPAA Training

Learners automatically receive a certificate of completion when they complete and pass the end-of-course assessments.

AUTOMATICALLY MANAGE YOUR TRAINING

Evolve's LMS helps you automatically manage your training. Courses are assigned to employees based upon their role and training needs. Learners access the LMS via secure login to take training lessons when their work schedules permit.

Course completion documentation is stored in the LMS electronically for convenient, accurate record-keeping; saving you hundreds of hours of manual data entry.

training available.**

HIPAA FOR COVERED ENTITIES

This course provides the foundation for understanding the HIPAA privacy and security regulations and the new requirements of the Omnibus Final Rule. It is designed for healthcare providers and other covered entities who need to provide HIPAA training to their staff. These include physician groups, medical practices, hospitals, ASC's, and clearinghouses.

HIPAA FOR BUSINESS ASSOCIATES

This course provides the foundation for understanding the privacy and security regulations for business associates. The course is designed for business associates who need to provide HIPAA training to their staffs. These include billing companies, consulting companies, accounting firms, health information organizations, patient safety companies, companies that provide data transmission services, subcontractors to business associates.

HIPAA AWARENESS

Updated with the Omnibus Final Rule, this course provides an overview of the components of the HIPAA privacy and security rules.

TEXAS HB300 & HIPAA PRIVACY

This course provides an overview of the privacy and security components of the HIPAA and the specific privacy requirements mandated by Texas HB300. The course provides the foundation for understanding the HIPAA privacy and security regulations and the new requirements of the Omnibus Final Rule. It is designed for healthcare providers and other covered entities who need to provide HIPAA training to their staff. These include physician groups, medical practices, hospitals, ASC's, and clearinghouses.

MEDICARE FRAUD & ABUSE

The False Claims Act is the primary tool to combat fraud and abuse against government health care programs. This course provides an overview of the False Claims Act, Anti-kickback statute, Stark Law and the new staff communication mandates from the Deficit Reduction Act. It details employer and employee responsibilities in preventing and identifying fraud and abuse and includes whistle blower activities and employee protections.

SHIPPING INFECTIOUS SUBSTANCES

Shipping and transporting infectious substances used in a laboratory or other healthcare organization can be dangerous for the shipper, carrier, and recipient of the package. Because of the dangers, those involved with the shipping and transportation of dangerous good must follow strict guidelines for packaging, labeling and documenting shipments. This course details the packaging and shipping requirements for shipping infectious substances.

MEDICAL OSHA COURSES

Learners have unlimited access to their assigned courses for one low fee; ensuring they can review their completed training without additional cost.

CHOOSE THE BRANDED PORTAL OPTION TO HAVE COMPLETE ADMINISTRATIVE CONTROL.

Larger organizations select our branded portal option to have the full LMS functionality, full administrative control and to brand the portal to their organization branding scheme.

With this option you can also create and deliver your own training content to your staff.

BACK CARE / ERGONOMICS

Back injuries, often from poor lifting techniques, are the most common type of occupational injury. In this lesson you will learn about muscle injury caused by repetitive stress, ways to minimize accidents and injuries and tips on how to arrange your work station to avoid ergonomic injuries.

BLOODBORNE PATHOGENS

Healthcare workers are at high risk for exposure to bloodborne pathogens. This lesson covers the OSHA requirements for minimizing your exposure to bloodborne pathogens through the use of Standard Precautions such as protective clothing and equipment, the appropriate handling of sharps, and the disposal of potentially infectious waste.

ELECTRICAL SAFETY

Electrical accidents can involve enough current to shock or even kill you. This lesson provides a basic understanding of electricity, how to identify electrical hazards in the workplace, safe work practices, safety tips to reduce your potential for electric shock, and how to respond to an emergency situation involving electricity.

FIRE SAFETY & EMERGENCY EVACUATION

Fire in a healthcare facility places the lives of staff and patients in great danger. This lesson provides an overview of fire suppression systems, including the proper use of fire extinguishers, emergency action plans and how to prevent fires.

FORMALDEHYDE SAFETY

Formaldehyde is one of the most common industrial chemicals in use today. It is commonly used as a preservative in medical laboratories and mortuaries. It is estimated that over four million people work with formaldehyde. This course educates the learner on the uses and dangers of formaldehyde and safe work practices when using it in the workplace.

HAND HYGIENE

Hand hygiene plays a critical role in infection control in healthcare settings. This course includes an overview of the recommended practices for hand antisepsis as outlined by CDC, WHO, OSHA and JCAHO by detailing when to use proper hand hygiene, proper hand hygiene techniques and differentiating between the different uses of soap and water handwashing, antibacterial soap and alcohol based handrubs.

HAZARD COMMUNICATION (GHS)

Most chemicals used in healthcare facilities have some hazard potential. This lesson provides an overview OSHA's hazard communication standard and outlines how changes to the standard have aligned HCS with the provisions of the Globally Harmonized System of Classification and Labeling of Chemicals (GHS). Additionally you will learn where to get the information you need, how to recognize and prevent exposure, and how to respond to a chemical accident.

defined schedule.*

INFECTION CONTROL

Healthcare-associated infections, or HAIs, are infections that people acquire while they are receiving treatment for another condition in a healthcare setting. This course educates healthcare workers in proper infection control to reduce incidences of infection related illnesses and death.

LABORATORY SAFETY

The laboratory environment can be a hazardous place to work. The purpose of this training course is to teach employees lab safety requirements to ensure that they know how to prevent accidents, injuries, and illness on the job. By completing this course learners will be able to understand the Chemical Hygiene Plan, identify laboratory hazards, take proper precautions to protect themselves, and act effectively in an emergency.

PATIENT RIGHTS

Healthcare providers and healthcare workers have a responsibility to provide care to patients in need. Just as important as the physical care is making sure providers and workers abide by and protect the rights, guaranteed by law, patients have. This course informs healthcare workers on patient rights so they are able to identify and protect against any violation of those rights.

PERSONAL PROTECTIVE EQUIPMENT

Personal Protective Equipment (PPE) is not a luxury, nor an optional convenience. PPE provides a barrier against physical, chemical, radiological, and biological hazards for healthcare staff. This course covers the types of PPE used in the healthcare industry, its requirements and limitations, and how to properly maintain and dispose of contaminated PPE.

PREVENTING WORKPLACE VIOLENCE

More assaults occur in the healthcare and social service industries than in any other. This course addresses workplace violence in healthcare settings and offers ways to prevent and minimize the threat of workplace violence in healthcare settings as well as practical ways to deal violent incidents should one occur.

SAFE PATIENT HANDLING

Nurses, aids, physical therapists, emergency workers, clinic staff and other healthcare workers all face the hazards associated with patient lifting and handling. In fact, the single greatest risk factor for overexertion injuries in healthcare workers is the manual lifting, moving and repositioning of patients, residents or clients. This course informs healthcare workers on safe and proper patient handling techniques in order to reduce and prevent injuries to workers and patients.

TB PROTECTION FOR HEALTHCARE WORKERS

This course is designed to educate healthcare personnel about the risks, treatment, and prevention of tuberculosis in order to increase safety in hospitals and other medical facilities. It will also provide information about the work practices recommended by the Centers for Disease Control and Prevention (CDC) that are designed to help prevent transmission of the disease.

YOU CAN CREATE YOUR OWN COURSE TRAINING BUNDLES

You can create your own training course bundles from the healthcare compliance courses we offer for even greater savings.

Assign all courses in the bundle to your staff or use the automatic assignment features of the Evolve LMS to assign specific courses to different groups of learners based on their training needs.

HUMAN RESOURCES / EEO COURSES

COMPUTER SECURITY

Cyber threats and cyberattacks to your company's and your personal computer systems are real. A security breach to your personal or work online data can result in the loss of money and time, identify theft, and stolen health, financial and personal information. This course educates the learner on computer security for their office and home computers and other portable and mobile devices.

DRIVER SAFETY

A typical driver in the U.S. travels 12,000 to 15,000 miles annually and has a one in 15 chance of being involved in a motor vehicle collision each year. Driving a motor vehicle, whether for work or personal use, is one of the riskiest things a person can do on any given day. This course addresses the basic defensive and safe driving practices and habits so individuals can drive more safely, carefully and responsibly.

DRUG & ALCOHOL FREE WORKPLACE

Substance abuse is a problem that affects the safety of all employees and the workplace. This course details ways to recognize possible substance abuse, steps organizations can take to prevent substance abuse, how to get help, and the appropriate reporting procedures.

ETHICS

Ethics is about doing the "right" thing. In a business setting, ethics also involves ensuring that company values are shared and upheld by all members of the organization. This course describes the elements of an ethics program and the six principles of ethics. Students also learn of the channels for reporting code violations should the need arise.

PREVENTING HARASSMENT AND DISCRIMINATION

This course provides employers, managers and employees an awareness of the laws and issues relating to discrimination and bullying in the workplace. It details the actions and responsibilities for avoiding discriminatory practices, associated with race, color, religion, sex, national origin, age, and physical or mental disability to create a workplace free of harassment and discrimination.

SEXUAL HARASSMENT PREVENTION

Sexual harassment is common throughout the workplace. Your occupation, educational background, age, race, ethnic group, or income level does not make you immune to harassment. This course provides the information to educate workers on behaviors that could be considered sexual harassment in the workplace and to provide strategies for dealing with harassing behavior.

CHOOSE THE BRANDED PORTAL OPTION TO DELIV- ER YOUR OWN TRAINING CONTENT.
